COMMERCIAL TRUCK MAINTENANCE CHECKLIST

www.LoadStop.com

SOME GENERAL ITEMS TO INCLUDE IN YOUR ROUTINE TRUCK MAINTENANCE CHECKLIST:

- Oil changes
- Lubrication
- Tire rotation
- Test seat belts
- Check for leaks
- Replace air filters
- Tuning of the engine
- Radiator maintenance
- Inspect brake systems
- Components tightening
- Perform general tuning
- Inspect wheel alignment
- Inspect the undercarriage

Inspect the exhaust system

Look for any damage to mirrors

Inspect wheels, rims, and tires

Check tire quality and air pressure

Inspect taillights and brake lights

Monitor steering and suspension systems

Test heating and air conditioning systems

Test the horn and see if it's loud enough

Monitor electrical system connections and lighting

Look for body damage to the interior and exterior of the vehicle

Check driveshafts, belts, hoses, and CV joints, repair and replace as needed

Inspect the wiper system and look for the driver, passenger side mirrors, and inside mirrors

Check all fluid levels and change them as required (this includes engine oil, brake oil, antifreeze, wiper fluids, power steering fluids, transmission fluids, and differential fluids)
